

## **Technical Data**

### **Graphite Packing**

This Graphite packing is braided construction from non-asbestos synthetic fibers. Each strand is lubricated with a special vegetable and marine oil and Graphite. When the braiding is finished the surface of the packing is Graphite coated so that the packing does not wick because of the lubricant.

**Service Type:** A very versatile plant maintenance packing for reciprocating and rotary equipment. Also for medium and high pressure

**Industries:** Marine, Boiler, Chemical, Oil and Refinery

**Recommended Usage:** Oil, Steam, Alkalines, Mild Acids and Brine

### **Service Conditions**

**Temperature:** 450 F (232 C)

**PH Range:** 4 - 10

**Pressure:** Up to 300 psi in dynamic service

**Shaft Speed:** Up to 1900 FPM
